Program No : 8

Title: Write a program in C++ to Read and Display the information of Employees Using Multiple Inheritance. Use Basic Info and Department Info as the base classes of the Employee class.

Name: Mokshada Hejib

Class:SY **Div:**SY1 **PRN No:**B25ET1013 **Batch:**A1

Program:

```
#include <iostream>

using namespace std;

class basic_info

{

protected:

   char name [30];

   int Emp_Id;

public:

    basic_info()

   {

      cout<<"Enter name of the employee: " ;

      cin>>name;

      cout<<"Enter the employee ID: " ;

      cin>>Emp_Id;

   }
```

```
};
class dept_info
{
protected:
    char dept_name [15];
    char work_assign[50];
public:
    dept_info()
    {
       cout<<"Enter name of the Department: " ;
       cin>> dept_name;
       cout<<"Enter the work assignment: " ;
       cin>>work_assign;
    }
};
class employeeinfo: public basic_info, public dept_info
{
public:
    employeeinfo()
    {
        cout << "\nEmployee information entered successfully.\n";
    }
```

```
    void Display_info()
    {
        cout << "\nEmployee Basic info is:\n";
        basic_info();
        cout << "\nEmployee dept info is:\n";
        dept_info();
    }
};
int main()
{
    int i,n;
    employeeinfo Emp[50];
    cout<<"Enter no. of Employee :" ;
    cin>> n;
    for (int i = 0; i < n; i++)
    {
        Emp[i].Display_info();
    }
    return 0;
}
```

Output:

Output

```
Enter name of the employee: Mokshada
Enter the employee ID: 13
Enter name of the Department: entc
Enter the work assignment: labortory

Employee information entered successfully.
Enter name of the employee: Mugdha
Enter the employee ID: 11
Enter name of the Department: computer
Enter the work assignment: theory

Employee information entered successfully.
Enter name of the employee: Kalyani
Enter the employee ID: 15
Enter name of the Department: entc
Enter the work assignment: labortory

Employee information entered successfully.
```
